Giornale Italiano di Endodonzia publishes original scientific articles, reviews, clinical articles and case reports in the field of Endodontology. Scientific contributions dealing with health, injuries to and diseases of the pulp and periradicular region, and their relationship with systemic well-being and health. Original scientific articles are published in the areas of biomedical science, applied materials science, bioengineering, epidemiology and social science relevant to endodontic disease and its management, and to the restoration of root-treated teeth. In addition, review articles, reports of clinical cases, book reviews, summaries and abstracts of scientific meetings and news items are accepted. Please read the instructions below carefully for details on the submission of manuscripts, the journal’s requirements and standards as well as information concerning the procedure after a manuscript has been accepted for publication in Giornale Italiano di Endodonzia. Authors are encouraged to visit www.giornaleitalianoendodonzia.it for further information on the preparation and submission of articles and figures.

Ethical guidelines
Giornale Italiano di Endodonzia adheres to the below ethical guidelines for publication and research.

Authorship and Acknowledgements
Authors submitting a paper do so on the understanding that the manuscript has been read and approved by all authors and that all authors agree to the submission of the manuscript to the Giornale Italiano di Endodonzia. Giornale Italiano di Endodonzia adheres to the definition of authorship set up by The International Committee of Medical Journal Editors (ICMJE). According to the ICMJE, authorship criteria should be based on 1) substantial contributions to conception and design of, or acquisition of data or analysis and interpretation of data, 2) drafting the article or revising it critically for important intellectual content and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. It is a requirement that all authors have been accredited as appropriate upon submission of the manuscript. Contributors who do not qualify as authors should be mentioned under Acknowledgements.

Manuscript preparation
Manuscripts should be uploaded as Word (.doc) or Rich Text Format (.rtf) files (not write-protected) plus separate figure files: TIF, EPS, JPEG files are acceptable for submission. The text file must contain the abstract, main text, references, tables and figure legends, but no embedded figures or title page. The title page should be provided as a separate file. In the main text, please reference figures as for instance figure 1, figure 2 etc to match the tag name you choose for the individual figure files uploaded.

Please note that manuscripts must be written in English. Authors whose native language is not English are strongly advised to have their manuscript checked by a language editing service or by a native English speaker prior to submission.

Manuscript Types Accepted
Original Scientific Articles must describe significant and original experimental observations and provide sufficient detail so that the observations can be critically evaluated and, if necessary, repeated. Original Scientific Articles must conform to the highest international standards in the field.

Review Articles are accepted for their broad general interest; all are refereed by experts in the field who are asked to comment on issues such as timeliness, general interest and balanced treatment of controversies, as well as on scientific accuracy. Reviews should generally include a clearly defined search strategy and take a broad view of the field rather than merely summarizing the authors’ own previous work. Extensive or unbalanced citation of the authors’ own publications is discouraged.

Mini Review Articles are accepted to address current evidence on well-defined clinical, research or methodological topics. All are refereed by experts in the field who are asked to comment on timeliness, general interest, balanced treatment of controversies, and scientific rigor. A clear research question, search strategy and balanced synthesis of the evidence is expected. Manuscripts are limited in terms of word-length and number of figures.

Clinical Articles are suited to describe significant improvements in clinical practice such as the report of a novel technique, a breakthrough in technology or practical approaches to recognised clinical challenges. They should conform to the highest scientific and clinical practice standards.

Case Reports or Case Series illustrating unusual and clinically relevant observations are acceptable, but they must be of sufficiently high quality to be considered worthy of publication in the Journal. On rare occasions, completed cases displaying nonobvious solutions to significant clinical challenges will be considered. Illustrative material must be of the highest quality and healing outcomes, if appropriate, should be demonstrated.

Manuscript Format
The official language of the publication is English. It is preferred that manuscript is professionally edited. All services are paid for and arranged by the author and use of one of these services does not guarantee acceptance or preference for publication.

Authors should pay special attention to the presentation of their research findings or clinical reports so that they may be communicated clearly. Technical jargon should be avoided as much as possible and clearly explained where its use is unavoidable. Abbreviations should also be kept to a minimum, particularly those that are not standard. Giornale Italiano di Endodonzia adheres to the conventions outlined in Units, Symbols and Abbreviations: A Guide for Medical and Scientific Editors and Authors. When non-standard terms appearing three or more times in the manuscript are to be abbreviated, they should be written out completely in the text when first used with the abbreviation in parenthesis. If abbreviations are used in the text, authors are required to write full name+abbreviation in brackets [e.g. Multiple Myeloma (MM)] the first time they are used, then only abbreviations can be written (apart from titles in this case authors have to write always the full name). If names of equipment or substances are mentioned in the text, brand, company names and locations (city and state) for equipment and substances should be included in parentheses within the text. The background and hypotheses underlying the study, as well as its main conclusions, should be clearly explained. Titles and abstracts especially should be written in language that will be readily intelligible to any scientist.

Structure
All manuscripts submitted to Giornale Italiano di Endodonzia should include Title Page, Abstract, Main Text, References and Acknowledgements, Tables, Figures and Figure Legends as appropriate.

Title Page should bear:
I. Title, which should be concise as well as descriptive (no more than 150 letters and spaces);
II. Initial(s) and last (family) name of each author;
III. Name and address of department, hospital or institution to which the work should be attributed;
IV. Running title (no more than 30 letters and spaces);
V. Three to five key words (in alphabetical order);
VI. Name, full postal address, telephone, fax number and e-mail address of author responsible for correspondence (Corresponding Author).

Abstracts should be no more than 250 words giving details of what was done; please choose Abstract for Original Scientific Articles should be no more than 250 words giving details of what was done using the following structure:

 Aim: give a clear statement of the main aim of the study and the main hypothesis tested, if any.
• Methodology: describe the methods adopted including, as appropriate, the design of the study, the
setting, entry requirements for subjects, use of materials, outcome measures and statistical tests.

- **Results**: give the main results of the study, including the outcome of any statistical analysis.
- **Conclusions**: state the primary conclusions of the study and their implications. Suggest areas for further research, if appropriate.

**Abstract for Review Articles** should be non-structured of no more than 250 words giving details of what was done including the literature search strategy.

**Abstract for Mini Review Articles** should be non-structured of no more than 250 words, including a clear research question, details of the literature search strategy and clear conclusions.

**Abstract for Case Reports and Case Series** should be no more than 250 words using the following structure:

- **Aim**: give a clear statement of the main aim of the report and the clinical problem which is addressed.
- **Summary**: describe the methods adopted including, as appropriate, the design of the study, the setting, entry requirements for subjects, use of materials, outcome measures and analysis if any.
- **Key learning points**: provide up to five short, bullet-pointed statements to highlight the key messages of the report. All points must be fully justified by material presented in the report.

**Abstract for Clinical Articles** should be no more than 250 words using the following structure:

- **Aim**: give a clear statement of the main aim of the report and the clinical problem which is addressed.
- **Methodology**: describe the methods adopted.
- **Results**: give the main results of the study.
- **Conclusions**: state the primary conclusions of the study.

**Main Text of Original Scientific Articles** should include Introduction, Materials and Methods, Results, Discussion and Conclusion.

**Main Text for Review Articles** should be divided into Introduction, Review and Conclusions. Please also include specifications of the source of funding for the work within the manuscript must be fully acknowledged, and any potential conflicts of interest noted. Grant or contribution numbers may be acknowledged, and principal grant holders should be listed. Acknowledgments should be brief and should not include thanks to anonymous referees and editors. Under this section a plae to specify contributory authors to the article other than the authors accredited. Please also include specifications of the source of funding for the study.

**References**: It is the policy of the Journal to encourage reference to the original papers rather than to literature reviews. Authors should therefore keep citations of reviews to the absolute minimum. References should be prepared according to the **Vancouver style**. References must be numbered consecutively in the order in which they are first cited in the text (not alphabetical order), and they must be identified in the text.
by Arabic numerals in brackets [example [34]]. References to personal communications and unpublished data should be incorporated in the text and not placed under the numbered references [Example: (Wright 2011, unpublished data) or (Wright 2011, personal communication)]. Where available, URLs for the references should be provided directly within the MS-Word document.

References in the References section must be prepared as follows:

I. more than three authors cite 3 authors et al. If the paper has only 4 authors, cite all authors; e.g. Prati G, Lotti M, Russo F et al.;

II. title style: please use a capital letter only for the first word of the title;

III. journal titles mentioned in the References list should be abbreviated according to the following websites:
   a. ISI Journal Abbreviations Index (https://www.library.caltech.edu/journal-title-abbreviations);
   b. Biological Journals and Abbreviations (http://home.ncifcrf.gov/research/bja);

IV. put year after the journal name;

V. never put month and day in the last part of the references;

VI. cite only the volume (not the issue in brackets);

VII. pages have to be abbreviated, e.g. 351-8.

We recommend the use of a tool such as EndNote or Reference Manager for reference management and formatting. EndNote reference styles can be searched for here: www.endnote.com/support/enstyles.asp. To ensure the correct citation format, please check your references in the PubMed database (http://www.ncbi.nlm.nih.gov/pubmed).

Examples of correct forms of reference follow.

**Standard journal article**

3. Chapter in a book

4. Published proceedings paper

5. Agency publication

6. Dissertation or thesis

7. URLS
   Full reference details must be given along with the URL, i.e. authorship, year, title of document/report and URL. If this information is not available, the reference should be removed and only the web address cited in the text.

**Tables, Figures and Figure Legends**

1. Tables should be submitted as word format, numbered and cited in the text of the manuscript. Units of measurements must be included in the column title or in the figure legend or caption. Figure files accepted: TIF, EPS, JPEG:
   - color (saved as CMYK): minimum 300 dpi;
   - black and white/grays: minimum 600 dpi;
   - one column width (8.0 cm) or 1.5 column widths (12.0 cm) or 2 columns widths (17.0 cm).

2. A different caption for each figure must be provided at the end of the manuscript, not included in the figure file. Authors must obtain written permission for the reproduction and adaptation of material which has already been published. A copy of the written permission has to be provided before publication (otherwise the paper cannot be published) and appropriately cited in the figure caption. The procedure for requesting the permission is the responsibility of the Authors; PAGEPress will not refund any costs incurred in obtaining permission. Alternatively, it is advisable to use materials from other (free) sources.

**Figure legends** should begin with a brief title for the whole figure and continue with a short description of each panel and the symbols used; they should not contain any details of methods.

**Authorship**

All persons designated as authors should qualify for authorship according to the ICMJE criteria. Each author should have participated sufficiently in the work to take public responsibility for the content. Authorship credit should only be based on substantial contributions to (i) conception and design, or analysis and interpretation of data; (ii) drafting the article or revising it critically for important intellectual content; (iii) final approval of the version to be published. These three conditions must all be met. Participation solely in the acquisition of funding or the collection of data does not justify authorship. General supervision of the research group is not sufficient for authorship. Any part of an article critical to its main conclusions must be the responsibility of at least one author. Authors should provide a brief description of their individual contributions.

**Obligation to Register Clinical Trials**

The ICMJE believes that it is important to foster a comprehensive, publicly available database of clinical trials. The ICMJE defines a clinical trial as any research project that prospectively assigns human subjects to intervention or concurrent comparison or control groups to study the cause-and-effect relationship between a medical intervention and a health outcome. Medical interventions include drugs, surgical procedures, devices, behavioral treatments, process-of-care changes, etc. Our journals require, as a condition of consideration for publication, registration in a public trials registry. The journal considers a trial for publication only if it has been registered before the enrollment of the first patient. The journal does not advocate one particular registry, but requires authors to register their trial in a registry that meets several criteria. The registry must be accessible to the public at no charge. It must be open to all prospective registrants and managed by a non-profit organization. There must be a mechanism to ensure the validity of the registration data, and the registry should be electronically searchable. An acceptable registry must include a minimum of data elements (http://www.icmje.org/g8clin_trials). For example http://www.clinicaltrials.gov sponsored by the United States National Library of Medicine, meets these requirements.
Open Journals System

An Open Access publication is one that meets the following two conditions:

1. The author(s) and copyright holder(s) grant(s) to all users a free, irrevocable, worldwide, perpetual right of access to, and a license to copy, use, distribute, transmit and display the work publicly and to make and distribute derivative works, in any digital medium for any responsible purpose, subject to proper attribution of authorship, as well as the right to make small numbers of printed copies for their personal use.

2. A complete version of the work and all supplemental materials, including a copy of the permission as stated above, in a suitable standard electronic format is deposited immediately upon initial publication in at least one online repository that is supported by an academic institution, scholarly society, government agency, or other well-established organization that seeks to enable open access, unrestricted distribution, interoperability, and long-term archiving.

Publishing your research as Open Access gives a number of advantages:

- Increased citation: studies have shown that Open Access articles are regarded and cited more often than established paywall journals/articles.
- Perpetual accessibility: Open Access articles are hosted on dedicated servers, being accessible to everyone endlessly.
- Funding opportunities: an increasing number of funding bodies and agencies requires their grant holders to publish their research as Open Access articles to be comprehensively available, free and without restrictions on re-use.

PAGEPress has chosen to apply the Creative Commons Attribution - NonCommercial 4.0 International License (CC BY-NC 4.0) to all manuscripts to be published under its name.

For authors

To make a submission to an OJS journal, after registering to the website, the authors will be required to follow a procedure via the system. Once the paper has been submitted, the authors will receive a confirmation email from the Managing Editor of the Journal.

When reporting a new submission, the Managing Editor assigns it to her/himself and to the Editor-in-Chief (EiC). After a quick in-house evaluation, if the EiC thinks that the paper is compliant with the guidelines and fits with the scope of the Journal, he/she send it out for the peer-review phase (he/she assigns reviewers). Alternatively, the EiC can assign a Section/Deputy Editor for the paper.

Once the review process is completed (i.e., all the assigned Reviewers have provided their comments and recommendations on the paper), the authors will be notified via email by the editors of the editorial decision: Accepted, Rejected, Decline Submission, Minor revisions, Major revisions.

Depending on the editorial decision, and basing on the reviewers’ comments, authors are required to upload their revised version (+ covering letter) within a specific deadline. At this point, they simply need to wait to hear back from the editor as to whether the revisions are acceptable. If the editor’s decision is to resubmit for review (+Major revisions or Minor revisions), the revised paper may undergo a “second round” of peer-review.

Once a paper is accepted for publication, the authors will be notified via email and their paper is moved to the “Copyediting phase”, where it is improved by the work of a copy-editor. Authors can be given the opportunity to review the copyedits. Lastly, once the copyedits are completed and approved, the submission moves to “Production stage”. In Production, the copyedited files are converted to galleys (PDF). Again, the authors have the opportunity to proofread the galleys. Once everyone is satisfied, the submission is scheduled for publication in a future issue.

The online journal management system that we are using allows authors to track the progress of their manuscript through the editorial process by simply logging into the Journal website.

***Peer-review policy***

All manuscripts submitted to our journal are critically assessed by external and/or in-house experts in accordance with the principles of peer review (http://www.icmje.org/#peer), which is fundamental to the scientific publication process and the dissemination of sound science. Each paper is first assigned by the Editors to an appropriate Associate Editor who has knowledge of the field discussed in the manuscript. The first step of manuscript selection takes place entirely in-house and has two major objectives: i) to establish the article's appropriateness for our journals readership; ii) to define the manuscript priority ranking relative to other manuscripts under consideration, since the number of papers that the journal receives is much greater than it can publish. If a manuscript does not receive a sufficiently high priority score to warrant publication, the editors will proceed to a quick rejection. The remaining articles are reviewed by at least two different external referees (second step or classical peer review). Manuscripts should be prepared according to the Uniform Requirements established by the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/#prepare).

ISTRUZIONI AGLI AUTORI

Il Giornale Italiano di Endodonzia è una pubblicazione esclusivamente disponibile in formato elettronico e rappresenta l’organo ufficiale della Società Italiana di Endodonzia. Si appoggia, per la sua diffusione ad ARIESDUE e gli articoli in esso pubblicati sono reperibili su www.giornaleitalianoendodonzia.it. La cadenza di pubblicazione è semestrale; giugno e novembre.
